This is our clarion call: that patients and professionals deserve the best. Take advantage of Clarion's Intel® Core™ Ultra Processor and its strong multitask computing all in a fanless unit. The optical bonded 10-point touch display provides brighter brights and crisper colors, with an anti-glare coating so you see the information, not the overhead lights. Including a built-in 5MP camera with privacy latch plus a speaker bar expansion, the TM-7200 comes ready for telehealth applications. Take it further with AI possibilities that can monitor and assess patients with machine vision and facial recognition. Lastly, if you want to upgrade, a wide range of I/Os make it possible. **Coming Q2 2026.**
