The TP-5710-15 has a powerful Intel 6-Core 35W i5 CPU and is built with high quality components to ensure the highest reliability and 24/7 use of industrial and commercial applications. The rugged computer is built with a high TDP processor that we designed into a fanless chassis, encouraging more computing power while still running efficiently and quietly. The 15" panel PC design has an IP66 front rated bezel, making it resistant to spills and sprays. Its modular design makes it easily implemented in a diverse range of applications including machine learning, AI, or 3D modeling.
