The TM-5957-22 features a powerful 11th generation Intel Core Tiger Lake i5/i7 processor capable of running Windows 11. Measuring at 44 mm in width and weighing only 11 pounds, this medical computer is the lightest medical computer in its class. The lightweight design makes it best-in-class for medical carts and bedside terminals that have been overweight and difficult to maneuver for too long. The front is IP65 rated with medical grade anti-bacterial coated plastic, so this PC can withstand spills, sprays and repeated wipe downs with cleaning chemicals. Because of the fanless cooling system, this PC has quiet operation and prevents the spread of dust and germs. For easy integration with other medical devices, the TM-5957-22 comes standard fully packed with WiFi 6, BT 5.2, a front camera, and even isolated I/Os. Healthcare personnel can switch rooms without having to power down the computer, or use a heavy battery powered cart, because this medical panel computer has an optional battery pack that provides about two hours of power.
