Teguar's GPU Expansion x16 Box PC is perfect for those looking for a rugged box PC with a high level of thermal design power (TDP) available for a GPU. The TB-5745-PCIE contains 1x PCIe-16, 2x PCIe-4 and a mini PCIe capable of drawing a total of 400W together (as high as 650W available upon request). This makes the unit compatible with the strongest and most popular graphics cards on the market today, including the AMD Radeon Pro W6600, the MSI GeForce RTX 3090, or other graphics cards that are PCI Express 4.0 x16 compatible. Couple this with the option of fanless cooling systems and you have countless GPU options regardless of environment. In addition to the added GPU compatibility, the TB-5745-PCIE comes equipped with over a dozen unique I/Os, including four USB 3.1 ports, two LAN ports, two COM ports, HDMI, DP, GPIO and more.
