The 12" Fanless [Panel PC](#) is a solid addition to any shop floor or manufacturing operation. The 12.1" full flat touchscreen display allows for easy interaction with facility software. By utilizing a system on chip (SoC) architecture, this unit can provide strong CPU performance without being a massive drain on power. Built with industrial-grade solid state components, this fanless panel pc can easily withstand working environments containing dust, dirt, and vibrations. The rugged housing is made of a tough die-cast aluminum and features an IP65 dust and waterproof rating on the front bezel. For added versatility you can choose to configure this computer to receive its power from a standard ethernet cable (PoE) rather than using a DC input cable.
